About me

I am Jacqueline Chow, a creative and athletic person who gets energy from designing and being active. In my spare time, I enjoy sports and am a big music lover and festival-goer. People describe me as enthusiastic, positive, and driven, with strong organizational and coordination skills. During my studies and involvement in a student association, I gained experience in planning, collaborating, and taking initiative. I want to put my enthusiasm and talent to work in a creative team, where I can continue to grow as a digital designer.

Softskills

- Enthusiastic & positive
